REGISTER

Please ensure that you register your caliper with MEI on installation. The two-year warranty will then commence from the date you registered your caliper. If the calipers are not registered then the 2 year warranty date will commence from the production date of the caliper.

You can register your caliper here:

<https://www.meibrakes.com/register-your-caliper.html>

Terms and Conditions are available on request or can be found on the MEI website

IDENTIFICATION - L SERIES CALIPERS (KNORR)

MEI Air Disc Brake Calipers are identified by the part number which is marked on the ID plate. After a long life in service or while still on the vehicle it can be difficult to read the information on the ID plate. Therefore the following can be useful in assisting identification.

Mounting Angle

First, check the air chamber mounting angle. This ranges from -12° to $+8^{\circ}$.

For radial calipers (LNR225) the mounting angle ranges from $+86^{\circ}$ to $+93^{\circ}$.

Guide Sleeve

Next, check if the Long Guide Sleeve is on the Left or Right as shown.

Size

Confirm the brake size. If there are bolts visible as shown in picture 1 (see below), attaching the cover plate to the housing, the brake is either LB195, LC225 or LA225.

- Measure the caliper at its widest point. If the caliper is 350mm diameter it is an LB195 brake.
- If the caliper is 375mm diameter it is either an LC225 or an LA225 brake. You can either:
 - Measure the diameter of the steel tappet head as shown in picture 2 (below). If the tappet head is 65mm wide it is an LC225. If it is 58mm wide it is an LA225.
 - Measure the distance between the guide sleeves as shown in picture 3 below. If the distance is 278mm it is an LA225. If it is 266mm it is an LC225.

If there are no bolts visible it is an LB225, LV225 or LNR225 brake. The mounting angle of the LNR brake (see earlier) makes it easy to identify. To distinguish between the LB225 and the LV225:

- Measure the diameter of the steel tappet head as shown in picture 2 above. If the tappet head is 65mm wide it is an LB225. If it is 58mm wide it is an LV225.

Tip: To distinguish between the LC225 and the LA225, or the LB225 and LV225, examine the steel tappet heads. Notice how the tappet heads are more prominent on the LC225 / LB225 (left) than on the LA225 / LV225 (right).

There are two other measurements that can help to identify the caliper.

The rotor diameter will be 377mm for LB195 brakes. For all other brakes it will be 430mm.

The pad width is 248mm for LNR225 and LB225 brakes. It is 245mm for LV225 brakes, 208mm for LA225 brakes and 211mm for LC225 and LB195 brakes.

Fitment Type

Check the pad wear sensor cable fitment type on the chain cover - it can be without sensor (left) or with sensor (right).

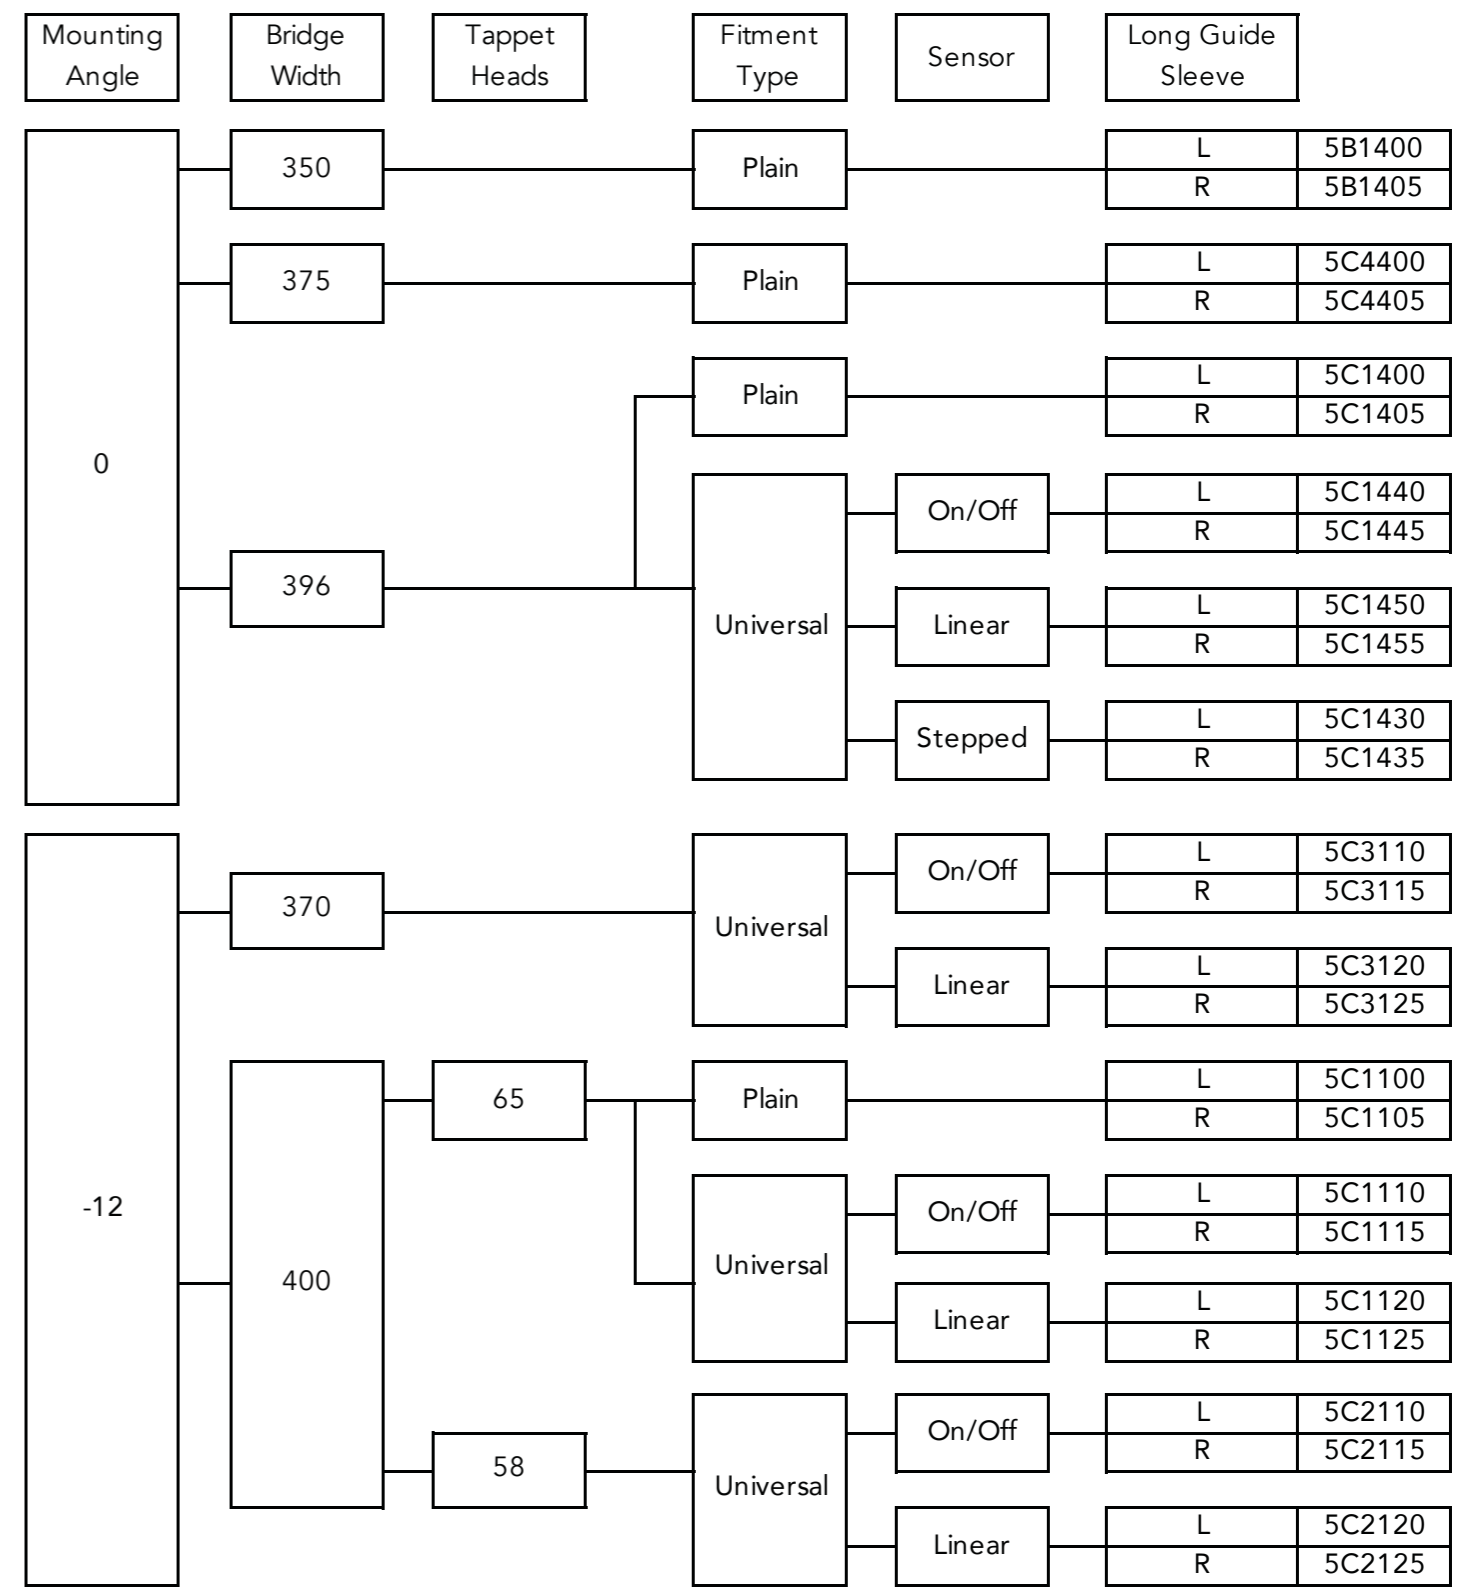

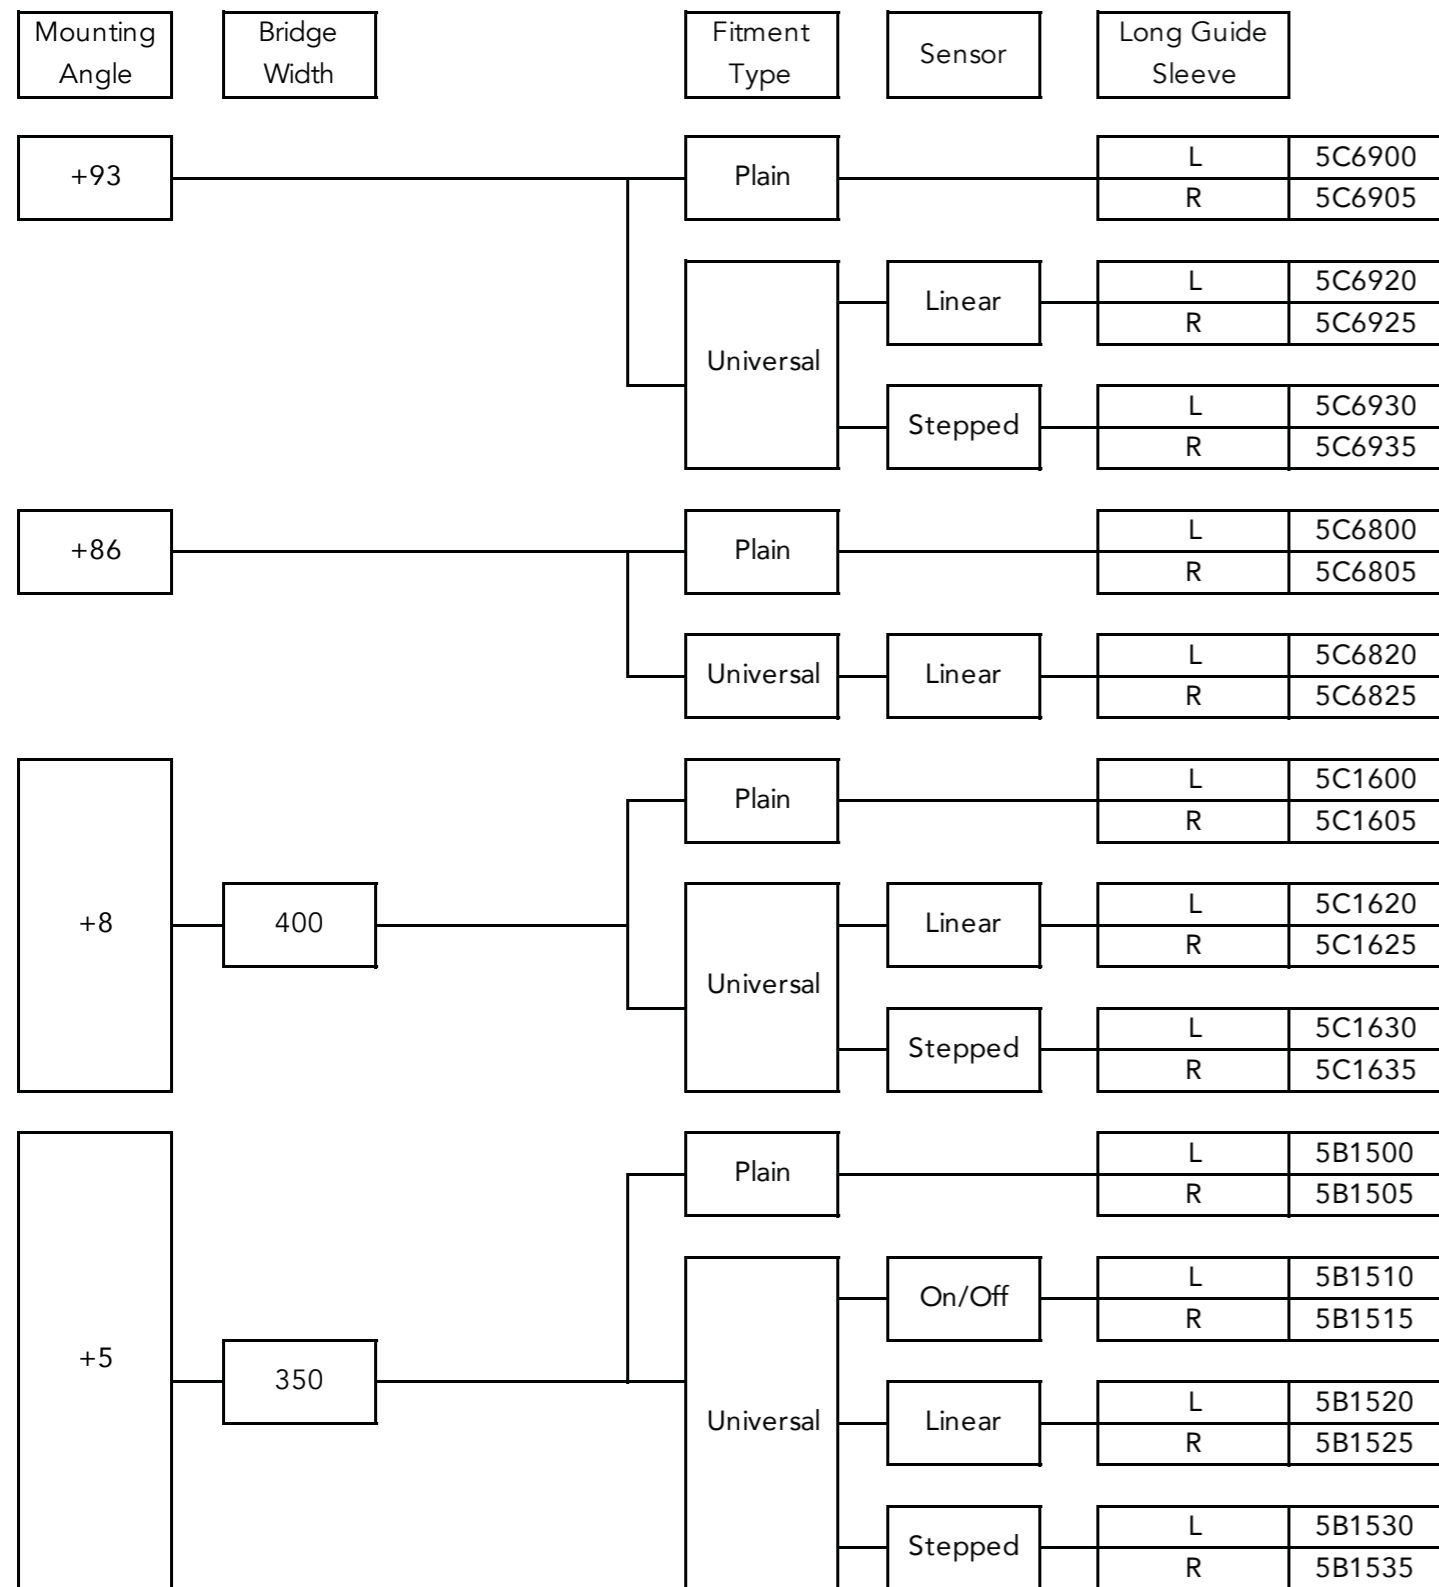

The pad wear sensor types are shown below:

If you have determined the type of caliper, the position of the long guide sleeve, the mounting angle and the fitment type then you should be able to identify the MEI part number. The next two pages will help with this process.

IDENTIFICATION - QUICK GUIDE (KNORR CALIPERS)

IDENTIFICATION - N SERIES CALIPERS (MERITOR)

MEI Air Disc Brake Calipers are identified by the part number which is marked on the ID plate. After a long life in service or while still on the vehicle it can be difficult to read the information on the ID plate. Therefore the following can be useful in assisting identification.

Mounting Angle

Check the air chamber mounting angle. This can either be +81 (NR225) or 0 degrees.

Size

Measure the distance between the centre of the guide sleeves. It will either be 305mm (NR225 or NT225) or 264mm (NV225, NX225, NV195 & NX195).

Measure the width of the pads. They will be either 250mm wide (NR225 or NT225), 216mm wide (NV225 or NX225) or 210mm wide (NV195 or NX195).

Carrier Mount

Check the carrier - there will be 6 x M20 bolts (NR225, NT225, NV225 & NV195 or 4 x M18 bolts (NX225 & NX195).

Guide Sleeve

Finally, check if the Long Guide Sleeve is on the Left or Right as shown.

Identification Guide

Once you have identified the mounting angle etc. you should be in a position to identify the caliper part number. The table below will help with this process.

Mounting Angle	Guide Sleeve Centre	Pad Width	Carrier Bolts	Fixed Guide Sleeve	Part Number	Type
+81	305mm	250mm	6 x M20	L	9C4200-74	NR225
				R	9C4205-74	
0	264mm	210mm	6 x M20	L	9B2100-71	NV195
				R	9B2105-71	
		216mm	4 x M18	L	9B1100-70	NX195
				R	9B1105-70	
	305mm	216mm	6 x M20	L	9C2100-73	NV225
				R	9C2105-73	
		210mm	4 x M18	L	9C1100-72	NX225
				R	9C1105-72	
250mm	6 x M20	L	9C3100-74	NT225		
		R	9C3105-74			

TYPICAL INSTALLATION POSITIONS

Looking at the wheel or Outboard Side:

12 o'clock Mount
Long Guide Sleeve
Leading

9 o'clock Mount
Long Guide Sleeve
Leading

3 o'clock Mount
Long Guide Sleeve
Trailing

Long Guide Sleeve
on the Left

Long Guide Sleeve
on the Left

Long Guide Sleeve
on the Right

If the brake is fitted at 12 o'clock the long guide sleeve is leading.

If the brake is fitted to the front or rear of the axle (3 o'clock or 9 o'clock) then it normally hangs from the long pin:
- if in front (9 o'clock) the long pin is leading
- if at the back (3 o'clock) the short pin is leading

If the brake is fitted to the front or rear of the axle (3 o'clock or 9 o'clock) then it normally hangs from the long pin:
- if in front (3 o'clock) the long pin is leading
- if at the back (9 o'clock) the short pin is leading

If the brake is fitted at 12 o'clock the long guide sleeve is leading.

FULLY SEALED CALIPERS

Water and dirt ingress have long been issues for brake calipers causing sliding problems on most applications.

Symptoms include:

- Hot Brakes, Excessive Outboard Pad Wear & Brake Rotor Wear, Leading to:
- Fleet Downtime, Higher Lifetime Caliper Costs & Increased Fleet Costs

MEI have patented the solution to these issues and all calipers are now produced with fully sealed stainless steel guide sleeve bushes.

- Tested in the Field
- MEI Patented System
- Fully Sealed Short Guide Pin
- Stainless Steel Outer Bush
- MEI Click & Seal Boot Cap
- Unique Design for MEI Calipers
- Sealed Boot to Protect the Exposed Guide Pin

5T1001 Fits: LB225

Replaces: K001278

Pad Size:
W 248mm
H 110mm
1 = 286mm
2 = 408mm M18 x 1.5
3 = 380mm M18 x 1.5
4 = 220mm M18 x 1.5

All dimensions are measured from hole centre to hole centre

5T1007 Fits: LB225

Replaces: K001507, K001520

Pad Size:
W 248mm
H 110 mm
1 = 286mm
2 = 400mm M20 x 2.5
3 = 378mm M20 x 2.5
4 = 290mm M20 x 2.5

All dimensions are measured from hole centre to hole centre

5T1002 Fits: LB225

Replaces: K001529, K001530

Pad Size:
W 248mm
H 110mm
1 = 286mm
2 = 408mm M16 x 1.5
3 = 378mm M16 x 1.5
4 = 290mm M16 x 1.5

All dimensions are measured from hole centre to hole centre

5T1008 Fits: LB225

Replaces: K017864

Pad Size:
W 248mm
H 110 mm
1 = 286mm
2 = 400mm M20 x 1.5
3 = 378mm M20 x 1.5
4 = 290mm M20 x 1.5

All dimensions are measured from hole centre to hole centre

5T1005 Fits: LC225

Replaces: K004099

Pad Size:
W 210mm
H 108mm
1 = 266mm
2 = 400mm M16 x 1.5
3 = 378mm M16 x 1.5
4 = 210mm M16 x 1.5

All dimensions are measured from hole centre to hole centre

5T1010 Fits: LC225

Replaces: K015308

Pad Size:
W 210mm
H 108mm
1 = 266mm
2 = 316mm M18 x 1.5
3 = 216mm M18 x 1.5

All dimensions are measured from hole centre to hole centre

5T1006 Fits: LB225

Replaces: K000026

Pad Size:
W 248mm
H 110mm
1 = 286mm
2 = 400mm M16 x 1.5
3 = 378mm M16 x 1.5
4 = 210mm M16 x 1.5

All dimensions are measured from hole centre to hole centre

5T1011 Fits: LB225

Replaces: K011479

Pad Size:
W 248mm
H 110 mm
1 = 286mm
2 = 400mm M18 x 1.5
3 = 378mm M18 x 1.5
4 = 290mm M18 x 1.5

All dimensions are measured from hole centre to hole centre
